

Wisconsin Pyramid Model

Promoting the social
and emotional
well-being of
infants and
young children

This training is designed for individuals who are able pace themselves to confidently complete online learning modules independently within a specific time frame.

- Participants must have reliable internet access and a device that allows them to stream video, engage in online polls and activities and download handouts and resources needed to engage in the learning content directly from the e-Modules.
- Participants will also need capacity to download and type into documents and/or scan and upload materials or take and email clear photographs/videos as evidence of implementation to share with their Reflective Coaches.
- While technical assistance is available, participants should feel confident in their skills before registering.
- IF USING ZOOM TECHNOLOGY...cohort members should have hardware and internet/data service needed to join web conferencing or use other digital formats to interact with the Reflective Coach.

Wisconsin Pyramid Model

Birth To 5 ONLINE MODULES

With Reflective Coaching

The Pyramid Model is an evidence based prevention/intervention framework created to **prevent challenging behavior and promote healthy social and emotional development** in young children, birth through first grade.

This learning opportunity allows participants to better understand practices that connect supporting positive relationships, engaging environments, intentionally planned social & emotional teaching strategies, and individualized interventions to enhancing social and emotional competence of young children. **Participants learn examples and concrete strategies for using recommended practices daily with infants, toddlers, young children and their families.**

This course provides participants with access and supports to engage with 18 hours of online e-Module interactive content. 6 additional hours of online reflective coaching will support individuals to self-assess, plan to and implement strategies and practices in their early care and education work. A Reflective Coach will provide guidance on implementation of the strategies and practices and request evidence of implementation plans within a 3 month time period. *All participants will receive information to create their login prior to the start date.*

Participants should expect to work on the course throughout the timeframe rather than all at the end and should expect to spend a full 24 hours completing the online and coaching sessions. Participants will receive 24 hours of continuing education after completing both the E-modules and reflective coaching.

This course meets requirements to earn YoungStar credit.

DATES:

September 22 – December 17, 2021

Participants must complete both the e-modules and the assigned reflections through online coaching.

Cost: \$50.00

(DCF has generously subsidized the cost of this training)
